

QW Name Search

October 24, 2011

Purpose: This service is being updated to show more comprehensive results including Warrants, Protective Orders, and Jail Release agreements. It also will now show the person type in relation to one of these documents.

Header and Connection

The header and connections will not change.

Body/Request Changes

Request

ridx parameter has been changed to page. This is an optional parameter if it is left off it will give you page 0 which is the first page. Service has been changed to page by page number now instead of the last party's index.

Response

W/PO column now returns 2 Characters instead of 1.

The first character represents Document type

W=Warrant

P=Protective Order

J=Jail Release Agreement

The Second Character represents the person type

P=Petitioner

L=Plaintiff

R=Respondent

O=Other

D=Defendant

Index Column

The index for each row will no longer be the person listed index. The index will be the index to the party that is the respondent or defendant for the order that person is linked to. If we have the following people attached to a Protective Order

Type	name	id
Petitioner	Joe Smith	9
Respondent	John Smith	12
Other	Josh Smith	14

The search response would look like this

LAST NAME	FIRST NAME	I	DOB	W/PO	INDEX
Smith	Joe	A	01-01-1950	PP	0000012
Smith	John	A	01-01-1950	PR	0000012
Smith	Josh	A	01-01-1950	PO	0000012

Index Id Matches Respondent Id

2 Letter Code indicating Protective Order and the parties type.

Operations/Examples

Examples are shown in dot slash (./) format. All these requests will include the header you are currently using. Only the body/request is shown in the examples.
